POSITIVE PAY

Positive Pay is a solution that helps reduce the risk of fraudulent ACH and checks as well as provides enhanced check reconciliation for your account(s).

To take advantage of this service, your company would simply upload your electronic check register or input written checks into our secure Online Banking website. If a check or ACH fails to match, you will be sent an email so you can review the exception and make the decision to approve or disapprove. It's that easy to start protecting your company from check fraud. With ACH Positive Pay, you can create rules around acceptable companies that can debit your account.

Advantages

- Automatically monitor and detect check fraud before checks are cleared, instead of during reconciliation.
- Improve the statement reconciliation process through the detection of duplicate check presentments and amount, check number, and payee mismatches.
- Flag any check for review when it is presented for payment to verify large dollar amounts, posting dates, etc.
- Approve or disapprove checks that are stale dated.

How it Works

- When checks are issued, your company would individually input the items or prepare a data file and transmit the file to us through Business Online Banking. We would work with you to develop a unique template that identifies the information you are providing.
- As checks are presented for payment, Positive Pay would verify that the information on the check matches the information in your data file.
- If a check fails to match, you will be sent an email so you can review the exception and make the decision to approve or disapprove. You will be able to view the front and back image of each exception item to verify that neither the payee name nor the endorsement has been altered.

THE STORY OF OUR EAGLE

Limestone Eagle

First National Bank's limestone eagle adorned the top of the bank building at 112 South Phillips Avenue from 1929 to 1976. When the new bank was constructed in 1976, the limestone eagle was moved to its present location on the southeast corner of 9th and Phillips.

Our eagle has become a landmark. It symbolizes the vision, strength, and stability of the Bank as well as the entire region.

Redwood Eagle

In 2004, the Bank commissioned Steve Fischer and Larry Hofstad of Exotic Carvings to create a redwood replica of the eagle.

The redwood is estimated to be 800 to 1,000 years old. The finished wooden eagle weighs about 1,500 pounds and is on casters so it can be transported to special events and branch locations.

TREASURY MANAGEMENT

Business Online and Mobile Banking

With Business Online and Mobile Banking, you can have a Treasury Management service at your fingertips to help you make the most of your company's finances. This online banking capacity allows you to:

- View balances, transactions, statement information, and the front and back of posted checks
- Transfer funds between your First National Bank accounts
- Manage your line of credit
- Export account information to your accounting software
- Protect account information by setting up account activity alerts and go green by enrolling for eStatements
- Safeguard your communication with your banker by using Secure Email
- Utilize direct deposit and payment capabilities through the Automated Clearing House (ACH) Network
- Make deposits from your office with Remote Deposit Capture or phone with Mobile Capture
- Pay your vendors, utilities, credit cards, or other bills online with Bill Pay
- Reduce fraud with Positive Pay
- Initiate stop payments and view your stop payment journal

Positive Pay

Positive Pay is a solution that helps reduce the risk of fraudulent activity on your account as well as provides enhanced account reconciliation. We offer both Check and ACH Positive Pay. *Check Positive Pay* – Your business simply uploads your electronic check register or inputs written checks into our secure Online Banking website. If a check fails to match, you will be sent an email or text message so you can review the exception and make the decision to pay or return the item. *ACH Positive Pay* – Your business sets up a list of approved vendors that are paid automatically, along with expiration dates and filters that cap the amount of money that can be paid to any one vendor. If an ACH transaction fails to match, you will be sent an email or text message so you can review the exception and make the decision to pay or return the item.

Advantages:

- Automatically to monitor and detect fraud before transactions are cleared, instead of during reconciliation.
- Improve the statement reconciliation process through the detection of duplicate check presentments and amount, check number, and payee mismatches.
- Approve or disapprove checks that are outstanding for a predetermined number of days.
